

Mike Fox

Lockheed Martin

Over forty years in the aircraft design, test, and certification field. Mr. Fox has focused on military aircraft while at General Dynamics and Lockheed Martin and advanced aircraft concepts while supporting NASA Langley Research Center. He has been an integral team member in numerous aircraft programs from the design through test flight phases for subscale testing, aerodynamics, and airworthiness certification. He led the origination of the F-35 Airworthiness Certification approach and process through a joint industry, government, and customer

forum, which has resulted in providing U.S. and international customers with an airworthy aircraft for fleet operations.

Mr. Fox is a Lockheed Martin Technical Fellow and supports the Engineering & Technology Airworthiness Team. He is also a co-founder of the Association of Airworthiness Professionals (AAP), an American Institute of Aeronautics and Astronautics (AIAA) Associate Fellow, a Society of Flight Test Engineers (SFTE) member, and an Eagle Scout.
