

Scott Gray, President, Elevate Systems

After being an Executive in the Defense Industry for over 25 years, Scott and his wife Maricela started Elevan LLC dba Elevate Systems in late 2012. Elevate Systems is an Engineering Services and Technology Firm based in San Antonio, Texas specializing in Department of Defense Weapon Systems Obsolescence and Sustaining Engineering Support. Elevate Systems specializes in reverse and re-engineering of legacy weapon systems mechanical parts and systems resulting in non-proprietary technical data. During this process Elevate Systems identifies and qualifies new sources of manufacture. Elevate Systems is utilizing state of the art 3D modeling and “printing” of mechanical parts in plastics, thermoplastics and various metals including stainless steel, aluminum and titanium. Elevate Systems has become known across the services as a leader in the additive manufacturing design and modeling areas. We also provide services for software development, Computer Vision.AI/ML, Robotic Process Automation, Cloud Automation/ Migration, DevSecOps & Digital Transformation and 2D to 3D Conversion.
